

*Your computer music. In any room. Wirelessly.*

*Presenting the Bose® SoundLink™ Wireless Music System*

Bose® SoundLink™ Wireless Music System

Enjoy the music on your computer almost anywhere in your house, even outdoors with the SoundLink Wireless Music System. No software, no complicated setup: A USB key

replaces the wires from your computer. Battery-powered portability lets you move the system from room to room.

iTunes®. Internet radio. Podcasts. Sports. There's an abundance of content available from your computer these days, much of it accessible nowhere else. Now, the SoundLink™ Wireless Digital Music System lets you enjoy that content in more areas around your house—your living room, kitchen or deck. It's easy: no wires, no software, no setup. And the system's robust sound quality will breathe new life into your music.

#### Just plug and play

How easy is it? Simply plug the small USB key into your computer, turn on the SoundLink™ System and select your music—iTunes, Internet Radio, whatever you like. That's it. There's nothing to configure and no cables to run. And you can control your music using the handy remote.

#### Room-to-room portability

And when you're ready to move—say, from the family room to a bedroom, or maybe out to the patio—your music moves with you. The rechargeable lithium-ion battery and convenient carry handle make it easy to take the system from place to place without missing a beat.

#### Bose quality performance

And all this convenience comes with no compromise in performance. Exclusive Bose waveguide speaker technology brings music to life, with the depth and clarity you were meant to enjoy. Voices sound natural and vibrant. Instruments sound clear and distinct. You may hear details you've never noticed before.

Get closer to your music—by moving away from your desk. The SoundLink™ Wireless Music System takes computer audio to exciting new places.

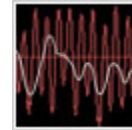

#### Key Features

**USB key** plugs into your computer and wirelessly sends audio to the system up to 60 feet away in a typical home.

**Waveguide speaker technology** helps enable full-bodied sound, especially in the lower registers, for more natural-sounding bass and percussion instruments.

**Bose digital signal processing circuitry** enables finer control over the sound for more consistent, lifelike music reproduction even at low volume levels.

**Rechargeable lithium-ion battery** delivers more power and longer playing time than other rechargeable batteries. Charges whenever the system is plugged into a wall outlet with included power cord.

**Built-in carry handle** allows quick, easy transport from place to place, even outdoors.

**Auxiliary input** for playing an MP3 player or DVD/CD player through the system.

**Remote control** operates power and volume, and can also play/pause and skip tracks within a playlist from almost anywhere in the room.

**Touch-sensitive volume control buttons** are located directly on system for when remote control is not readily available.
