

Bose® surround sound has never been easier to enjoy.

The Lifestyle® V25 home entertainment system delivers vivid, theater-like sound that brings movies, sports, video games and music to life.

And now, it lets you enjoy that experience easier than ever before. Easy-to-follow onscreen messages guide you through the setup process. And the remote

control and navigation menus make your entire system so easy to use, you may not even need the instructions. This unique combination of performance and simplicity is only available from Bose

Easy to set up. Easy to use.

The beauty of the Lifestyle® V-class™ system resides in its breakthrough simplicity. The new Unify intelligent integration system walks you through system setup, step by step. As you're attaching components to the control console, the system recommends the best connectors via on-screen messages. It even confirms that the connection was made properly.

Each connected device is automatically added to the source menu accessed on your TV screen. No more toggling through video inputs to find the right source. If you add a Blu-ray player, it will be shown as a "Blu-ray player" in the on-screen menu. This makes it easy and intuitive for anyone to use the Unify system.

Unify technology also simplifies programming your Bose remote to control your Lifestyle® system and almost anything attached to it. During setup, the Unify system references an internal database to identify each connected component, and automatically teaches the Bose remote to control it. Plus, you'll view system information, including iPod and FM/AM status, on the Bose remote's LCD screen.

And once you're set up ...

You'll experience uncompromising surround sound, a hallmark of Lifestyle® systems. The V-class system features compact cube speakers that blend elegantly into your room. They produce compelling sound you'd expect from speakers many times their size. That performance is complemented by an Acoustimass® Module that can be placed in a corner or out of view. Exclusive technology in the module helps provide the emotional intensity you feel at the theatre or in a concert hall. Even hidden out of sight, its impact can't be missed.

Sound designed for your room

Your room is unique, with size, shape, textures and other elements affecting the sound you hear. The ADAPTIQ™ system was developed to analyze your room and then adjust the Lifestyle® surround sound system for a consistent, high-quality performance.

Key Technologies:

Unify™ intelligent integration system uses on-screen navigation to simplify system setup and everyday use.

ADAPTIQ® audio calibration system provides greater freedom of speaker placement.

Bose® link whole-home audio technology lets you connect compatible Bose products in as many as 14 additional rooms—even outdoors.

Acoustimass® Module works in concert with the small speakers to deliver a fuller range of theatre sound and effects.

Direct/Reflecting® speaker technology delivers lifelike spaciousness from a natural balance of reflected and direct sound—similar to a live performance.

Automatic video upscaling ensures movies and sports use the highest resolution capabilities of your display—up to 1080p over HDMI.

Proprietary Videostage® 5 decoding and post-processing circuitry, combined with digital 5.1 decoding and DTS®, delivers a high quality, multichannel surround sound experience from practically any source
