

*Bose® surround sound.*

*Easier than ever.*

The Bose® Lifestyle® T20 home theatre speaker system brings out the best in your movies, games and sports. And now, it's easier than ever before to set up your system and all connected sources. Exclusive Bose Unify™ technology provides easy-to-follow onscreen messages to guide you

through the entire setup process. It even verifies your connections or take away all the guesswork. Enjoy up to 6 HD video sources—such as your Blu-ray Disc™ player, cable box and gaming system. And control it all with one convenient remote.

The Lifestyle® T20 speaker system offers breakthrough simplicity with the new Unify intelligent integration system. This proprietary technology enables a step-by-step walkthrough of your system setup. As you're attaching components to the control console, the system recommends the best connectors via on-screen messages. It even confirms that the connection was made properly.

Each connected product is automatically added to the source menu accessed on your TV screen. No more toggling through video inputs to find your source. If you add a Blu-ray player, it will be shown as a "Blu-ray player" in the on-screen menu. This makes it easy and intuitive for anyone to use the Unify system.

Unify technology also simplifies programming your Bose remote to control your Lifestyle® system and most anything attached to it. During setup, the Unify system references an internal database to identify each connected product, and automatically teaches the Bose remote to control it.

#### Experience lifelike surround sound

This Lifestyle® home theatre speaker system uses Direct/Reflecting® cube speakers to fill your room with compelling surround sound. You'll hear movies, music and sports come to life in convincing detail. The small speakers work in concert with a hideaway Acoustimass® Module. Exclusive technology in the module helps provide the emotional intensity you feel at the theater or in a concert hall.

#### Sound designed for your room

Your room is unique, with size, shape, textures and other elements affecting the sound you hear. The ADAPTiQ™ system was developed to analyze your room and then adjust the Lifestyle® surround sound system for a consistent, high-quality performance

#### Key Technologies:

**Unify™ intelligent integration system** uses on-screen navigation to simplify system setup and everyday use. Clear, on-screen menus provide all the information you need for your connected sources.

**ADAPTiQ™ audio calibration system** analyzes the way your room's dimensions and other variables affect sound, then automatically adjusts the sound of your Lifestyle® surround sound system to the acoustics of your room.

**Control console** with connections for up to 6 HD sources (4 HDMI inputs)

**Acoustimass® Module** works in concert with the small speakers to deliver a fuller range of theater sound and effects

**Remote** controls your Bose system and the components you've attached. Works on radio frequency to operate through walls and floors.

**Proprietary Videostage® 5 decoding and post-processing circuitry**, combined with digital 5.1 decoding and DTS®, delivers a high quality, multichannel surround sound experience from practically any source

**Direct/Reflecting® speaker technology** delivers lifelike spaciousness from a natural balance of reflected and direct sound—similar to a live performance.
