

# Bose® Around-Ear Headphones

Love music?

Wait until you experience it through  
the Bose® Around-Ear Headphones

High-performance audio in a stylish, lightweight design. Bose® technologies deliver rich musical nuances rarely found in conventional headphones. Comfortable fit for hours of listening.

Stylish Bose® Around-Ear headphones answer the call for smooth, high-performance sound in a very lightweight package.

Hear the full spectrum of your music whether you're plugged into a computer or on the go with a portable media device.

## **Bose® sound. To go.**

With Bose technology, you don't have to compromise the quality of your audio just because you're listening through a pair of headphones.

Our *acoustic equalization* techniques deliver the rich nuances of your music that conventional headphones often lose. You hear the intricate notes of an acoustic guitar, the full range of vocals and even the beat of a drum with greater clarity and impact.

*TriPort™ headphone technology* faithfully reproduces deep, full low notes without requiring the artificial bass boost function found on many portable players.

## **Comfortable fit included**

Advanced ergonomics and lightweight design define the stylish TriPort headphones.

Soft ear cushions gently fit around your ear for hours of comfortable listening. A thin, adjustable headband has several head size settings and the ear cups swivel for a better fit.

An additional benefit of Bose Around Ear headphone technology is that it helps reduce headphone size without sacrificing performance, resulting in a total weight of only five ounces.

Bose Around-Ear headphones put it all together: **high-performance sound, comfortable fit and stylish design** for an eye-catching, ear-pleasing audio experience.

## **Key Features**

### **Acoustic Structure of the TriPort™ headphone system**

Enjoy deeper, richer lows from a small headphone design. Proprietary Bose® technology utilizes three small ports in the ear cups to produce a richness of audio performance remarkable for headphones this small.

### **Acoustic equalization**

Innovative Bose technology that fine-tunes the frequency response of the headphones so you can experience rich, clear sound.

### **Adjustable headband**

Comfortable settings for a wide variety of head sizes give you up to three inches of adjustment in headband length.

### **TriPort™ ear cushions**

Ergonomic design ensures maximum audio performance and comfortable fit.

### **5' extension cord**

An additional 5' cable allows freedom of movement and increased accessibility to audio sources.

### **Carry bag**

Provides an easy way to carry your headphones wherever you go.
