

HEAR YOUR IPOD®.....

....THE BOSE® WAY!

SoundDock™ systems bring your iPod® tunes to life for all to hear.

Unique Bose® technologies enable sizeable performance from these small and stylish systems. Their award-winning design is no less striking, so they fit nicely just about anywhere at home or on the go.

Easy to use 'Just dock' and play your compatible iPod®. It charges while you enjoy music with no interruptions.

Bose® SoundDock™ Portable Digital Music System

Music has the power to move you and Bose has an iPod® speaker system that moves with your music. The SoundDock™ Portable digital music system reproduces your favorite tunes with fullness and clarity unusual for a portable system. And it's so compact, you

can take it just about anywhere, even outdoors.

Bose® proprietary waveguide speaker technology and powerful neodymium speakers provide efficient, high quality audio from a slim profile.

A rechargeable lithium-ion battery (included) provides more power and longer playing time than most rechargeable batteries.

The rotating iPod® docking station disappears for storage and protection during transit. The molded handle makes it easy to carry this iPod® accessory from place to place.

A custom remote easily controls the system and basic iPod® functions including playlist navigation. The auxiliary input lets you play other portable sources too.

Bose® SoundDock™ Series II Digital Music System

The system combines premium Bose® performance with a stylish design, delivering rich, room-filling sound, while charging it simultaneously.

A new improved remote control lets you control your system and basic iPod® functions and jump through playlists as well.

Added feature now includes an auxiliary input that allows connectivity with other audio sources as well.

Bose® SoundDock™ Classic Digital Music System

The original SoundDock Digital Music System. It works with most iPod® models. Its Infrared remote, controls system volume and basic iPod® functions from across the room.

All SoundDock™ Digital Music Systems are Apple® certified and are compatible with all iPhone™ and most iPod models.
