

Stereo Acoustimass® Speakers

Fill your room with Music, rather than Speakers

Their SOUND defies their SIZE

Acoustimass® 5 Series III Speaker System

STEREO SPEAKERS WITH EVEN BETTER SOUND. THE SIZE WILL SURPRISE YOU AND SO WILL THE SOUND.

You will expect much larger speakers when you hear the Acoustimass® 5 Series III Speakers. Yet the spacious sound actually comes from two tiny cube speaker arrays and a hideaway Acoustimass module.

The improved cube speakers offer you enhanced performance, contemporary styling and a smaller size. And the improved module fills your room with even deeper, fuller bass.

These Virtually Invisible™ speakers are the definitive answer to the question of how to combine spacious sound with space-saving design.

Though the Virtually Invisible™ speaker design of the Acoustimass® 5 speaker system may seem like a disappearing act, the performance is quite noticeable.

Full, resonating bass and crystal-clear highs envelop your room in beautiful stereo sound. It's all the result of intense research and testing.

Acoustimass® 3 Series IV Speaker System.

Experience enhanced sound from our most affordable, next-generation Acoustimass stereo speakers. The Acoustimass 3 system delivers bass that's the deep and full.

Two single-cube speakers – smaller than ever before – are elegantly designed to fit virtually any decor. And the module easily hides away behind furniture or off in a corner. So all the lifelike sound seems to flow from the tiny cubes.

EXPAND EASILY TO HOME THEATRE.

Now or in the future, turn your Acoustimass stereo speakers into a front channel solution for home theatre by simply adding the compatible Bose VCS-10™ center channel speaker. For full five-speaker surround sound, add the VCS-30™ centre/surround speaker package.
