

Lifelike performance from stereo components

A versatile option for both music and movie listening, these small speakers provide balanced stereo sound in an elegant design. They work with both your stereo and your home theatre components and blend easily into practically any decor.

Technology drives the performance

Beneath the sleek exterior of each 161™ speaker resides the technology that makes these speakers so versatile. Two proprietary Twiddler drivers in each enclosure help the 161™ speaker rival speakers of much larger size. Articulated Array™ speaker design positions those drivers to provide a large, consistent sound field so you can enjoy Stereo Everywhere® speaker performance from almost anywhere in the room.

Performance and versatility

In your dorm, office or living room, you'll enjoy the rich, full musical performance these small speakers can provide. And they are an ideal choice for home theatre applications. Connect them to your existing home theatre system and enjoy Bose® sound from your favorite movies.

When you add the 161™ speakers/SA-2 amplifier package to your Lifestyle® system, you can enjoy Bose quality sound in any room in your house. Easy to set up. Simple to use. With selected Lifestyle® systems and the SA-2 amplifier, you can even have music in one room, while the kids enjoy movies in another, at the same time, from the same system. With custom mounting brackets, these elegant speakers offer a range of placement options throughout your home or office. And if you already own our 161™ speakers and a Bose® Lifestyle® system, our SA-2 amplifier is very easy to add.

KEY FEATURES:

Articulated Array™ speaker design

Positions the drivers to provide a large, consistent sound field so you can enjoy Stereo Everywhere® speaker performance from almost anywhere in the room.

High excursion Twiddler™ drivers

Enjoy clear, low frequencies from a small speaker that blends into your room's decor.

Stereo Everywhere® speaker performance

The remarkable result of proprietary Bose® technologies that produce balanced stereo sound over a wide area. Experience consistent coverage that's unmatched by most conventional speakers that radiate sound into the room in a single direction.

Home theatre expansion capable

Experience exciting, cinema-like sound and a seamless home theatre design when you combine this product with the Bose® VCS-10™ centre channel speaker and any Direct/Reflecting® speaker system.

Magnetically shielded speakers

Allows for speaker placement in close proximity to your TV without interfering with the picture quality.

Automatic protection circuitry

Circuitry protects drivers from being overdriven and provides increased reliability without interfering with the listening experience.

Syncom™ computer tested

Contributes to one of the highest levels of quality and reliability in the audio industry.

Custom brackets included

Enjoy easy installation and numerous placement possibilities.
