

Dynamic centre channel speaker that "locks" dramatic dialogue to the screen.

The VCS-10™ centre channel speaker combines with your existing speakers and surround sound receiver to deliver exciting home theatre sound. Get more

from your component system and enjoy lifelike movie dialogue, even when you're seated off to either side.

The voice of home theatre

Special effects add excitement to the home theatre experience, but the dialogue in a great movie is just as important. While your front and rear speakers process action and effects, the VCS-10 centre channel works with your surround sound receiver to produce dialog with rich, natural tones that seem to come directly from the screen. Each phrase can be lifelike and clear, so you don't miss a word.

The VCS-10 centre channel speaker is designed to complement your TV or entertainment centre. Its patented Compound Loaded™ drivers deliver clear, cinema-like dialogue. And Articulated Array™ speaker design "locks" dialogue on screen and provides a large consistent sound field for a cinema-like experience.

The VCS-10 centre channel speaker features slim, sleek dimensions that complement your television or entertainment centre. Picture distortion is prevented by the VCS-10 centre channel speaker's magnetic shielding.

This centre channel speaker is an appropriate choice for upgrading your component home theatre system one piece at a time. It is also available as part of our home theatre speaker packages.

Key Features

Articulated Array™ speaker design

Proprietary centre channel design that "locks" dialogue on screen. Experience cinema-like dialogue and strong centre imaging from anywhere in the room.

Slim profile design

Elegantly blends with most televisions and entertainment centres, unlike most bulky speakers.

Compound Loaded™ drivers

These patented Bose® drivers optimize output to deliver rich, clear dialogue from a streamlined speaker that complements your TV or entertainment centre.

Two flared ports

Hear smoother, cleaner low-frequency effects, especially at high volumes.

Magnetically shielded speakers

Allows for speaker placement in close proximity to your TV without interfering with the picture quality.

Automatic protection circuitry

Circuitry protects drivers from being overdriven and provides increased reliability without interfering with the listening experience
