

For a smaller on-ear fit...

## the QuietComfort™ 3 Noise Cancelling™ Headsets

We began researching noise reduction technology 28 years ago. Since then, we've been leading the industry in advancing the category that we created.

Studies show that many people prefer on-the-ear headphones, but with conventional technology, smaller earcups compromise performance. So Bose® launched a research project to explore something we were not sure was even possible - overcoming the performance limitations of smaller size and on-the-ear design.

**Hear the difference Bose® technology makes.** When we first introduced the first QuietComfort headphones, people were amazed at the silence they could hear.

In order to reduce the size of the QuietComfort 3 Acoustic Noise Cancelling headphones - without compromising performance - Bose engineers employed a new proprietary acoustic design to ensure audio quality at all frequencies, a new electronic design to deliver superior noise-reduction, and a new mechanical design to ensure a comfortable fit for long-term listening. With these advances, the QuietComfort 3 Acoustic Noise Cancelling headphone overcomes the performance trade-offs found in conventional on-ear headphones, and offers a listening experience previously only available in larger, over-ear designs.

Today, the on-ear QC3 headphones meet that same exacting performance standard. You will notice a dramatic decrease in engine roar on a plane as the cabin becomes more peaceful.

Connect your CD or MP3 player, or listen to the in-flight movie. You'll hear detail you may have never experienced while flying. Use them at home or at the office, too. Although the noise reduction will be more subtle, you should notice distractions fading softly into the background.

No headphones will eliminate all noise, but patented Bose noise reduction and audio technologies, working together, can make any listening experience more enjoyable.

**Convenient and compatible.** The audio cord is detachable, so you can easily remove it when you want to enjoy the convenience of noise reduction without the cord. And easily reattach it when you want to listen to music.

To improve convenience, the QuietComfort™ 3 Acoustic Noise Cancelling™ headphones fold flat in a smaller, slimmer carrying case and come with a rechargeable battery. They are ideal for travel, home or office and can be used with portable audio devices, including select stereo-enabled mobile phones

### Key Features

**Acoustic Noise Cancelling® headphones**  
Proprietary Bose® technology electronically identifies and reduces noise while faithfully preserving the audio or tranquility you desire.

**TriPort® acoustic headphone structure**  
Enjoy deeper, richer lows from a compact headphone design. TriPort acoustic headphone structure features small ports in each earcup to produce a rich audio performance remarkable for headphones this size.

**Active equalization**  
Electronically tunes the frequency response, enabling outstanding audio performance.

**Single, detachable audio cable**  
Greater convenience than standard dual-cable designs.

**Low battery-life indicator**  
On/Off light flashes when approximately four hours of battery life remain.

**QuietComfort® ear cushions**  
Proprietary soft cushion, on-ear design establishes a critical acoustical seal between the headphones and your ears. This enhances the benefits of our Acoustic Noise Cancelling® headphones and helps to provide superior audio quality.

**Adjustable headband**  
Up to three inches of adjustment in headband length.

**Dual-plug adapter**  
Single headphone plug converts to dual jacks for connecting to a variety of in-flight audio sources.

**¼" stereo-plug adapter**  
Converts the 1/8" (3.5 mm) headphone plug to a 1/4" (6.3 mm) plug for jacks used on home stereo equipment.

**5' extension cord**  
Additional cable for more freedom of movement and increased accessibility to audio sources.

**Fold-flat earcups**  
On-ear headphones rotate 90 degrees to fold flat for easy portability and storage in slim carrying case.

**Portable carrying case**  
Sleek, compact case to protect your headphones and store accessories
