

*Acclaimed Bose audio*

*in a lightweight on-ear design*

First your eyes capture the elegant design, the small black and silver earcups. Slip them on, and your ears tell you they're softly padded and fit comfortably. Finally, plug them in. You just may decide you're hearing your music with more lifelike clarity and range than ever before.

### **Bose technologies make the difference**

What sets the sound of these headphones apart? The proprietary Bose® technologies that produce full-bodied, lifelike audio in a compact on-ear design.

Only Bose headphones feature our TriPort® acoustic headphone structure, for example. This exclusive technology—developed after years of Bose research—helps deliver the full range of audible frequencies in small, lightweight headphones.

You hear the deep lows of your music, the warm mid tones and shimmering highs. Whatever your musical tastes, Bose on-ear headphones faithfully reproduce the subtle nuances and powerful choruses, across the spectrum of human hearing.

### **Designed for performance, comfort and convenience**

The audio cable for Bose on-ear headphones attaches to just one earcup, so there's more freedom of movement and less tangling than with Y-cables. Detachable 43" and 16" single-line cables are included with purchase. Use the shorter cable for armband or shirt pocket connections, or connect it to the longer cable when you need added reach.

**One listen is all it takes**

Bose on-ear headphones also feature fold-flat earcups and a collapsible headband for easy portability and storage in their protective carrying case.

### **Key Features**

#### **Comfortable on-ear design**

High-performance headphones with small, pivoting earcups that rest gently on your ears. Proprietary cushions enhance audio performance and stay comfortable for hours.

#### **TriPort® acoustic headphone structure**

Enjoy deeper, richer lows from a compact headphone design. Helps produce a quality audio performance remarkable for headphones this size.

#### **Adjustable, collapsible headband**

Up to three inches of adjustment in headband length. The earcups also fold up into the headband for increased portability and easy storage.

#### **Single-earcup, detachable audio cables**

Standard-length 43" cable and shorter 16" cable attach to just one earcup for greater convenience and less tangling than conventional Y-cables. Use the 16" cable with players on armbands or in shirt pockets. Or link the cables together when you need added reach.

#### **Carrying case**

Slim protective case includes storage space for accessories.
