

Introducing desktop theatre

The Companion® 5 multimedia speaker system is engineered to deliver the excitement of surround sound content right at your computer—

without the clutter of five speakers. Just two small speakers and a hideaway Acoustimass® module deliver much of the audio performance you'd expect from a five-speaker surround sound system. And a single USB connection is all it takes—no special software, hardware or sound card upgrade necessary.*

Desktop theatre: Admit one

Five-speaker systems are great for your living room or home-theatre room. Maybe not for the office, bedroom or dorm room, where your computer lives. Yet, without a way to fully appreciate those breathtaking 5.1 game and movie soundtracks, you're missing much of the fun.

Now you can enjoy an enveloping sound experience without enveloping yourself in hardware. Our proprietary TrueSpace® surround digital processing circuitry enables two elegant desktop speakers and a compact module to put you in the middle of the action.

The soundstage seems to envelop you. And the experience is developed especially for computer listening, so you're right in the middle of the music, the game, and the special effects.

Enjoy Bose convenience

The Companion 5 system features a handy, all-in-one control pod to keep speaker volume control, single-touch mute, headphone jack and an auxiliary input all within easy reach. Speakers are mounted on stands enabling superb performance and more usable desktop space.

*For optimum performance, we recommend Windows XP or later. For Macintosh computers, OS X 10.4.6 or later.

Salient Features

Proprietary TrueSpace® surround digital processing circuitry

Creates an immersive sound environment from just two visible speakers. The system is designed for sitting at the computer.

Digital 5.1 audio playback

Brings music, games, movies and other 5.1-decoded material to life with much of the performance you'd expect from a five-speaker system.

USB simplicity

System links to your computer through a single USB connection. No special software, sound card upgrade, adaptors or complicated wiring needed.

Preassembled speakers/stands

Speakers come fully assembled on stands for superb performance and more usable desktop space.

Compact Acoustimass® module

Delivers clean, deep low frequencies into the room. The module can be hidden almost anywhere in the listening area and allows for small, elegant speakers without sacrificing performance.

Control pod

Intuitive and convenient, this multi-function pod houses volume control, single-touch mute, headphone jack and connection for a second audio source such as an MP3 player.

Magnetically shielded speakers

Magnetic field is essentially confined inside the speakers and will not cause monitor interference or damage to magnetic media such as audio cassette tapes.

Patented integrated signal processing

Enjoy lifelike, rich performance at almost any volume level.

Compression circuitry

Allows you to enjoy clear, undistorted sound—even at high volumes.

Active equalization

Electronically tunes the frequency response, enabling outstanding audio performance.

Dual inputs

Enjoy two audio sources simultaneously—one to your computer, the other to a portable audio device.

Specifications:

Control pod	• 2 1/2"H x 1 1/8"D
Two satellite speakers	• 8 9/10"H x 5 4/5"W x 3 4/5"D • (22.5 x 14.7 x 9.7 cm)
Weight	• 1.9 lbs (.09 kg)
Acoustimass® module	• 8 1/2"H x 6 3/4"W x 16 3/4"D • (21.8 x 17.3 x 42.5 cm)
Weight	• 15.4 lbs (6.99 kg)
System in carton	• 10 1/2"L x 15 1/4"W x 19 3/4"H • (26.7 x 38.6 x 50.1 cm)
Weight	• 27 lbs (12.3 kg)
