

Experience the power of great performance.

Our finest Lifestyle® system for home theatre without uMusic™. System includes Jewel Cube® speaker arrays and a DVD/CD player. The ADAPTiQ™ system easily customizes sound to your room's acoustics. HDMI compatible for a high-quality video experience.

Home theatre designed for your room

Acoustimass® module delivers resonant low tones for added depth in your movies and music. Like the rest of the system, it's designed to complement, not overwhelm, your décor. Our advanced media centre features an AM/FM tuner and progressive scan DVD/CD player to support the many media formats you enjoy today.

It's one thing to have realistic home theatre sound that breathes new life into your movies. It's even better when that sound is optimized for your room and the way it's set up. The innovative ADAPTiQ™ audio calibration system, first analyzes, then adjusts the system's sound to your room's dimensions, speaker placement and preferred seating locations. You simply enjoy the performance with no need for further adjustments to your system, or your room.

Homewide audio made easy

The Lifestyle® 35 system features Bose® link technology to deliver music throughout your home. Add Bose® link-enabled products, and your system is now the hub for sound in as many as 14 additional areas, even outdoors. Enjoy independent volume control in each area, as well as access to two different audio streams from the same Lifestyle® system.

Simplicity for your video sources

Simplify the integration of a Lifestyle® 35 DVD home theatre system with your video sources including those with HDMI. The VS-2 video enhancer automatically synchronizes the audio and video you want with the touch of a button. You'll receive the highest video resolution your TV can accept, all the way up to 1080p over HDMI.

TECHNOLOGIES THAT SET IT APART:

ADAPTiQ™ audio calibration system
Automatically customizes your Lifestyle® system's sound to your room's acoustics.

Want to enjoy Bose performance throughout your home?

Enjoy music throughout your home, even outdoors. All from one system.

Bose® Videostage® 5 decoding circuitry delivers a home theatre experience from almost any source.

Video upscaling The VS-2 video enhancer enables video resolution all the way up to 1080p over HDMI.
