

# It's time to expect more from home theatre.

## Your room is unique. So is this system.

The hidden beauty of the Lifestyle® 48 DVD system lies in the Bose® technologies that make enjoying music and movies intuitively simple. Start with your main room—the size, shape, textures and other elements that affect the sound you hear. The ADAPTiQ™ system, analyzes your room and then adjusts the Lifestyle® system for a consistent, high quality performance each time you listen.

No need to move furniture, speakers or anything else to get the best possible sound in your room. Just sit in five of your preferred listening spots, and allow the ADAPTiQ™ system to automatically make the necessary adjustments.

## Meet your digital DJ

Consider the hassle of managing your treasured, but unwieldy, CD collection. The Lifestyle® 48 DVD system changes all that with unique Bose® technology that stores up to 340 hours of music. The uMusic™+ intelligent playback system actually listens to your music and learns your preferences, then makes selections based on what you like. No more searching for CDs or deciding which tracks to listen to. Whatever your mood, let uMusic™+ system know and it will serve the songs you want to hear.

And you can hear them almost anywhere. Bose® link enables quality sound in as many as 14 additional rooms, even outdoors. Just add compatible Bose® products, and you can have independent volume control in each room, as well as access to two different audio streams from the same Lifestyle® system.

## Fill your room with sound, not equipment

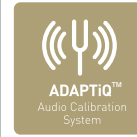

The Lifestyle® 48 DVD system features award-winning Jewel Cube® speaker arrays measuring only 11cm high for dramatically lifelike sound. These are our smallest and most powerful speaker arrays, yet they deliver sound you'd expect from speakers many times their size. And a sleek horizontal centre channel speaker locks dialogue on screen.

The proprietary Acoustimass® module produces resounding low notes that bring action sequences to life and add fullness to music. The Acoustimass® module can be placed out of sight, so all the sound seems to come from the smaller speakers.

## Simplicity for your video sources

Simplify the integration of a Lifestyle® 48 DVD home theatre system with your video sources including those with HDMI. The new VS-2 video enhancer automatically synchronizes the audio and video you want at the touch of a button. You'll receive the highest video resolution your TV can accept, all the way up to 1080p over HDMI.

## TECHNOLOGIES THAT SET IT APART:

**ADAPTiQ™ audio calibration system**  
Automatically customizes your Lifestyle® system's sound to your room's acoustics.

**uMusic™+ intelligent playback system** has the unique ability to listen to the music you play and learn your preferences based on your likes, dislikes, or even your mood at the moment.

**Want to enjoy Bose® performance throughout your home?**  
Enjoy music throughout your home even outdoors. All from one system.

**Video upscaling** The VS-2 video enhancer enables video resolution all the way up to 1080p over HDMI.

**Bose Videostage™ 5 decoding circuitry** delivers a home theatre experience from almost any source.
