

*“Enjoy lifelike stereo performance from your laptop, PC and portable audio sources.”*

Computer MusicMonitor™ is our finest two-piece computer speaker system. It was created to satisfy the growing number of computer users who:

- enjoy music and other entertainment from their laptops and PCs
- take sound quality seriously, and
- want a space-saving computer speaker option for their desk and work area

Until now, rich, satisfying computer sound had been possible only from much larger speakers or three-piece systems with a bass module. The MusicMonitor™ has no bass module, yet offers surprisingly full, rich sound with deep low notes—and frees up space on and around your desk.

The system's unexpected performance results from the latest in switching amplifier technology combined with new, proprietary acoustic design, highly efficient neodymium speakers and Bose digital signal processing.

Together, these technologies allow the MusicMonitor™ to deliver accurate, full-range sound surprising for its size.

The system is unobtrusive yet elegant, with solid aluminum casing and a metallic silver / black finish.

It complements your laptop or PC and fits nicely almost anywhere in your home. A handy remote keeps on/off and volume control at your fingertips. Or, use the buttons on the right-hand speaker. Connect the system to your computer or other audio source using the audio input on the back of the speaker.

Hear the fullness and detail you may have been missing from your favorite downloads, Internet radio and much more—simply and elegantly.

Carry this wherever you go as your companion for presentations that have audio content. The optional carry case makes it easy to do so.

The Computer MusicMonitor - Our best, and most exciting, two-piece desktop speaker solution. From the most respected name in sound.

#### **Salient Features :**

- Bose proprietary acoustic designs
- High output
- Efficient amplification
