

Home Theatre may be simpler than you think

Surround sound without room invasion

If you've been looking for a surround sound solution that doesn't require hours of setup and creative ways to hide the wires, the search is over.

Designed to provide performance and simplicity unmatched by conventional component or all-in-one solutions, this system delights the ears *and* the eyes.

Look at the 3-2-1 system, and the first thing you notice is what you don't notice.

Bose speakers in the front. Bose sound all around.

Think of the feeling you get from lifelike special effects or a powerful soundtrack. The emotions they evoke, enhancing the experience. Usually, that experience comes from a five-speaker system.

The 3-2-1 system combines an articulated array speaker design with proprietary signal processing to give you much of that same performance.

Hear the roar of a train from left to right from just two visible speakers positioned in the front of your room. Enjoy a spacious soundstage and lifelike surround effects whether you're watching the game, listening to a favorite CD or enjoying the latest on DVD.

The elegant media centre that features a progressive scan DVD/CD player, with an HDMI output and AM/FM tuner. You'll enjoy vivid detail in your movies and sports with video resolution up to 1080p over HDMI.

And don't worry about adjusting the bass when switching from movies to music. We've taken care of that with automatic tonal adjustment, which ensures the proper amount of bass whether you're taking a journey into space or enjoying a classical concerto.

Technology that makes a difference

Unique speaker design with proprietary signal processing

Each of the new speaker arrays has a ported enclosure with two precisely oriented transducers. The two speakers are designed to work in concert with the proprietary signal processing to deliver a multi-channel presentation.

Acoustimass™ module with improved proprietary bass technology.

Specifications:

Media Center:

Dimensions: 3.25"H x 13.75"W x 10"D

Speaker arrays:

Dimensions: 3¹/₂"H x 7³/₄"W x 5³/₈"D
Magnetically shielded.

Acoustimass Module:

Dimensions: 14¹/₂"H x 8³/₄"W x 19¹/₈"D

System (in carton):

Dimensions: 21¹/₂"H x 20"W x 18"D

Weight: 22.7 kg
