

## Our premium choice in the 3•2•1™ system family with music storage

The Bose® 3•2•1 GSX Series III DVD home entertainment system puts you at the centre of exciting home theatre with just two visible Gemstone® speaker arrays and a hideaway Acoustimass® module.

Setup is simple because, unlike traditional five-speaker surround systems, there are no center or rear speakers.

An elegant media center features a progressive scan DVD/CD player with an HDMI output and AM/FM tuner. You'll enjoy vivid detail in your movies and sports with video resolution up to 1080p over HDMI.

The 3•2•1 GSX system digitally stores and organizes up to 200 hours of music from your CDs. The uMusic® intelligent playback system actually listens to your musical choices and learns your preferences, then makes selections based on what you like. No more searching for CDs or deciding which tracks to listen to: The uMusic system delivers the songs you want to hear.

Two compact Gemstone speaker arrays produce realistic effects you might expect from a five-speaker system. A hideaway Acoustimass module delivers emphatic low notes, while keeping a low profile in a corner, or even out of sight. So everything blends more easily with your décor. Setup is easier than traditional 5.1-channel home theatre surround sound systems. Just connect three wires and plug the system in for basic operation.

Proprietary TrueSpace® digital processing circuitry produces pure Bose sound that convincingly sweeps across your room. And Videostage® 5 decoding circuitry will also liven up classic movies and TV programs recorded before surround sound speaker systems became popular.

Home theater with  
*fewer speakers and wires.*  
Now with an intelligent  
approach to music.

### Technology that makes a difference

**TrueSpace™ surround digital processing circuitry** allows the two small speakers and Acoustimass™ module to deliver

much of the home theatre experience that other systems use five speakers to create.

**Home theatre with fewer wires:** No need for rear speakers and wires running to the back of your room.

**Digitally store up to 200 hours** of your favorite music inside the elegant media centre.

**The uMusic™ intelligent playback system** makes enjoying your favorite music even easier. It learns your musical tastes as you listen and selects music for you.

**Powerful neodymium iron boron magnet** inside the Gemstone™ speaker delivers the force to produce rich, full sound.

### Specifications:

- **Media centre:**
