

Premium sound for your second room.. ..a great complement to your Lifestyle System

Our highest level of stereo performance, exclusively designed to expand your Lifestyle® system to a second room

Bring the premium sound of your Lifestyle® home theater system to a second room. The Lifestyle® Homewide powered speaker system is specifically designed as an aesthetic and acoustic match to the Lifestyle® 48 system with Jewel Cube speakers and uMusic®+ technology, but is compatible with all Lifestyle® systems.

The Homewide powered speaker system sets a new standard in Bose® multi-room expansion. You can experience the full sound quality of your Lifestyle® system in another room with tiny, but powerful, Jewel Cube speakers. Only 4½" high, they deliver a level of sound you'd expect from speakers many times larger. A powered Acoustimass module provides emphatic low notes for dramatic movie effects and beautiful depth in your music. Together, the speakers and Acoustimass module ensure our highest level of stereo performance.

The quality sound you experience is customized to your room with the ADAPTiQ audio calibration system. This proprietary technology accounts for the unique acoustic characteristics of your room. And it allows for freedom of speaker placement while assuring consistent audio performance.

Best of all, it all comes in one box with a Bose link cable and Personal® music center II remote for connection to—and control of—your Lifestyle® system. The Lifestyle® Homewide speaker system is also compatible with the AL8 system, allowing expansion to a second room without the need for room-to-room wiring.

Salient Features :
