

You have to hear it....to believe it

Brace yourself for our best-sounding system for your iPod. The Bose SoundDock™ 10 system delivers performance so powerful and lifelike, it could easily become your home's main music system. It's ideal for parties, gatherings—or

your own personal listening. You've probably never heard your iPod sound this good.

You'll experience a vast tonal range, from the deep lows of a bass line to the soaring highs of a vocalist. It's the result of advanced Bose waveguide speaker technology coupled with a highly efficient, one-of-a-kind new woofer.

The waveguide, a long tube intricately folded inside the system, strengthens sound from the woofer to deliver deeper, stronger low notes you'll notice right away.

Simple to use. Easy to enjoy

Though complex on the inside, the SoundDock 10 Digital Music System is delightfully easy to use, with an equally uncomplicated exterior design. Just place your iPod or iPhone into the dock and play. The system's clean, elegant look complements any living area

Enjoy other sources, too

You can easily enjoy an additional sound source—such as an MP3 or DVD player—by connecting it to the system's auxiliary input. The SoundDock 10 system remote can switch back and forth between your iPod and the connected source, and will navigate an iPod playlist as well. There's even an output for watching iPod video on your TV while listening to it on the system. Have a *Bluetooth* stereo music phone? Listen wirelessly with the optional *Bluetooth* music dock.

Hear our best-performing digital music system once, and we think you'll agree—there's nothing like it.

KEY FEATURES:

Advanced waveguide speaker technology, only from Bose, enables full-bodied sound, especially in lower registers, for more natural-sounding bass and percussion instruments.

Newly designed woofer has a larger magnet than conventional woofers—for powerful performance, with low notes you can feel.

Bose® digital signal processing circuitry enables finer control over the sound for more consistent, lifelike music reproduction even at low volume levels.

System is Apple® certified and compatible with all iPhone™ and most iPod models.

Video output for watching iPod/iPhone video on your TV while listening on your SoundDock 10 system.

Auxiliary input for playing an MP3 player, CD/DVD player or TV through the system.

Remote control handles power, volume, track seek and iPod playlists from almost anywhere in the room.

Docked iPod/iPhone charges, even while playing, as long as system is plugged in.

Optional Bluetooth dock allows your stereo *Bluetooth* music phone to play through the system.
